

CALIBRATION REFERENCE

100 mm on paper = 5.00 m

Dimensions in mm

CALIBRATION & MEASUREMENT VALIDATION

Independent scales in each zone. Calibrate A, B, C and each D reference separately.

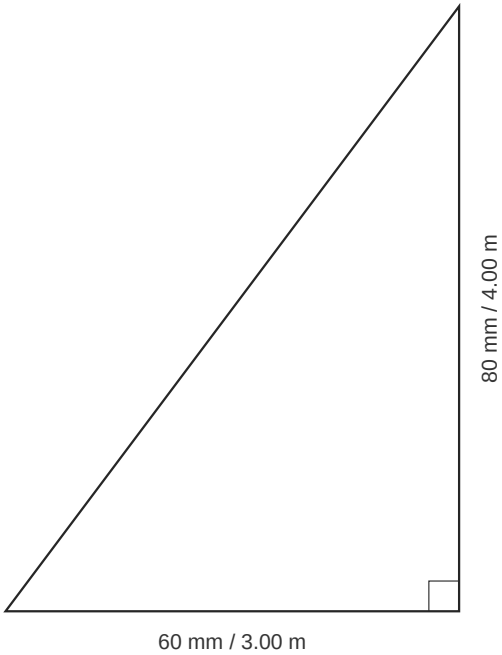

A Uniform 1:50

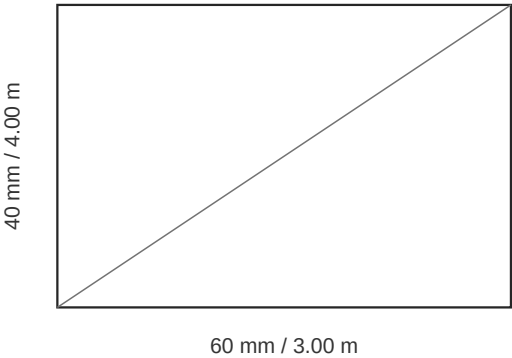

3-4-5 TRIANGLE

X = 3.00 m
Y = 4.00 m
Diagonal = 5.00 m

Diagonal: 100 mm on paper

B X/Y calibration

3.00 x 4.00 m
Area 12.00 m²
Diagonal 5.00 m

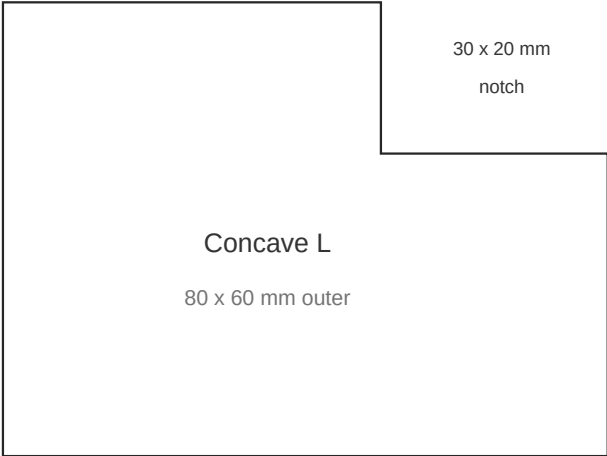

Use both axis references; this zone is intentionally anisotropic.

C Geometry checks at 1:50

Area 12.00 m²
Perimeter 14.00 m

Area 10.50 m²
Perimeter 14.00 m

1.00 m²

D Scale presets

Each line is exactly 100 mm.

Measure shape outlines. The L notch is removed from the upper-right corner.
